AIxC Launches RoboShare & Co. North American Dealer Program as First Flywheel Case, Secures One-year $33,000 Robot Rental Order and Expands A Signed FFAI Robot Order to 23 Units

August 27, 2026

Long-Term Rental Demand Drives Robot Sales, While RoboShare & Co. Enables Dealers to Participate in Post-Delivery Shared Rentals and Operations

LOS ANGELES, Aug. 27, 2026 /PRNewswire/ -- AIxCrypto Holdings, Inc. (Nasdaq: AIXC) ("AIxC" or the "Company") today announced the first commercial example of the RoboShare business flywheel, as an upcoming one-year, $33,000 long-term robot rental order helped drive the expansion of an education-sector customer's planned purchase from five NAVI robots to a signed order for 23 FFAI robots.

At the same time, AIxC is launching **RoboShare & Co.**, its North American dealer partner program designed to extend the model to a broader network of partners across robot supply, customer demand, referrals and local fulfillment.

The education-sector customer originally planned to purchase five FX NAVI robots. After seeing the potential for recurring robot utilization demonstrated by RoboShare's long-term rental order, the customer expanded its purchase to a signed order for **23 FFAI robots**. The expanded order represents 18 additional robot unit sales for FFAI and broadens the product mix from one model to three.

For AIxC, the transaction demonstrates the initial operation of the RoboShare flywheel: where we anticipate rental demand can support new robot purchases for our partners, which subsequently increases the overall supply on the RoboShare platform.

Starting with FFAI hardware as its first platform partner, RoboShare is designed to seamlessly onboard diverse robot brands, equipment models, and asset owners.

Launching RoboShare & Co. Across North America

Building on this initial order validation, AIxC is launching the **RoboShare & Co. North American dealer partner program** on August 26, opening five partnership paths for **ROBOPAR dealers, asset owners, users, referral partners and rental operators**.

The program is designed to bring dealer coverage, robot assets, customer demand, referral channels and local fulfillment capabilities into the RoboShare ecosystem through distinct partnership models.

For dealers, RoboShare can provide an additional post-delivery path for generating rental demand and creating subsequent robot sales opportunities. Asset owners can make eligible robot assets available for rental; users can access robots based on their operational needs; referral partners can introduce potential customers and opportunities; and rental operators can support local deployment and fulfillment.

The model begins with FFAI products while remaining open to additional robot brands, models and asset owners.

In addition, RoboShare & Co. could provide AIxC with a potentially more capital-efficient path to expanding platform supply. By incorporating robots purchased and owned by customers, dealers and other third parties, RoboShare could increase its potential pool of rentable assets without requiring AIxC to purchase and own every robot deployed through the platform.

The model also creates a direct point of coordination between AIxC and partners like FFAI: RoboShare rental demand can support additional robot sales and real-world use cases, while third-party purchases can increase the pool of robot assets potentially available through RoboShare.

Expanding the RoboShare Flywheel

Building on the first order and the launch of RoboShare & Co., RoboShare's next phase will focus on fulfilling the one-year rental order, converting partner participation into rentable assets and local fulfillment capacity, and expanding beyond education into events, commercial services, security, inspection and other applications.

Future expansion will be guided by actual customer demand and order economics and may include additional robot brands, models and asset owners.

AIxC intends to measure progress through actual operating results, the number of robots actually onboarded to RoboShare, fulfillment of the one-year rental order, robots available for rental, utilization, repeat rentals, marketplace transaction volume, platform commissions and direct service revenue.

The signed 23-unit order provides an initial proof of concept for the RoboShare flywheel, while the launch of RoboShare & Co. marks the next stage of expanding the model across North America as AIxC works toward building North America's largest and most diverse robot-sharing platform.

About AIxCrypto Holdings, Inc.
AIxCrypto Holdings, Inc. (Nasdaq: AIXC) is a technology company focused on the commercial deployment of physical AI. The Company, through its subsidiary, operates RoboShare, an online marketplace for robot sharing that connects robot owners with customers needing robotic capability on demand. Forward-Looking Statements

This communication, including any presentation, press release, investor materials or other document of which it forms a part (this "Communication"), contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, as amended, and other securities laws, regarding AIxCrypto Holdings, Inc. ("AIxCrypto," the "Company," "us," "our," or "we") and our industry. All statements, whether written or oral, other than statements of historical fact, including any financial projections and any statements regarding future events, our strategy, our transition to robotics operations, our plans for RoboShare, our digital asset disposition plans, our objectives, expectations, or anticipated actions or results, are forward-looking statements. You can often identify forward-looking statements by words such as "may," "might," "will," "shall," "should," "expects," "plans," "anticipates," "could," "intends," "targets," "projects," "contemplates," "believes," "estimates," "predicts," "potential," "goal," "objective," "seeks," "likely," or "continue," or the negative of these terms or other similar expressions; the absence of these words does not mean a statement is not forward-looking. These statements reflect our current expectations and projections about future events as of the date of this Communication and are necessarily based on estimates and assumptions that, while considered reasonable by management, are inherently uncertain. AIxCrypto can give no assurance that such forward-looking statements or financial projections will prove to be correct.

Actual results may differ materially from those expressed or implied by these forward-looking statements as a result of numerous risks and uncertainties, both general and specific, including, but not limited to:

Liquidity, capital and going concern. Our limited cash and liquidity position and our history of operating losses and negative operating cash flow; substantial doubt regarding our ability to continue as a going concern, as described in our periodic reports; our need to obtain additional financing on acceptable terms or at all, and the substantial dilution to existing stockholders that additional financing may cause; our ability to fund operations pending and following the disposition of our digital asset positions; and our ability to satisfy the continued listing requirements of The Nasdaq Stock Market, including stockholders' equity, minimum bid price and other applicable standards.

Our strategic transition and the disposition of digital assets. Risks associated with a fundamental shift in our business strategy and the redeployment of resources from a digital asset treasury strategy to robotics operations; our ability to execute the disposition of our digital asset positions in an orderly manner and on acceptable terms; the risk that amounts realized on disposition are materially less than carrying value as a result of price volatility, market depth, execution timing, custody or transfer constraints, or other limitations; tax, accounting and regulatory consequences of the dispositions; the continued volatility and regulatory uncertainty associated with digital assets and cryptocurrencies during the wind-down period; the concentration of a substantial portion of our assets in a single equity investment, including an investment in a related party, and the illiquidity, valuation uncertainty, holding-period and transfer restrictions associated with that investment; and risks arising from our relationships and agreements with related parties and significant stockholders.

Our robotics operations business. Our limited operating history in robotics operations and commercialization and the absence of a meaningful revenue history; the early stage of RoboShare and the risk that customer demand, repeat demand, pricing, utilization or unit economics do not develop as anticipated; our dependence on a small number of customers, on a single initial geographic market, and on individual events or engagements, and the risk that the loss of, or a change in the terms of, any such relationship has a disproportionate effect; our dependence on third-party robot owners, operators, suppliers, original equipment manufacturers and local partners, and on their willingness to make robots available on our platform; risks relating to the availability, cost, quality, maintenance, transport, insurance and technological obsolescence of robots and related equipment, and to supply chains, tariffs and trade measures affecting them; and our ability to expand into additional markets and to attract and retain participants on both sides of our marketplace.

Operations, safety and liability. Risks of property damage, personal injury or death arising from the operation of humanoid robots, quadrupeds and other autonomous or semi-autonomous machines in proximity to performers, employees, guests and the public, including at live events and in uncontrolled environments; product liability, premises liability, negligence and related claims and the adequacy, scope, availability and cost of our insurance coverage and of contractual indemnities from customers, owners and suppliers; the allocation of responsibility among us, robot owners, venues, event producers and customers; permitting, licensing, occupational safety and event-specific regulatory requirements; and the reputational consequences of any safety incident.

Technology, data and intellectual property. Systems, network, telecommunications or service disruptions, failures, defects or cyber-attacks; the performance, reliability and autonomy limitations of robotic systems and of the software, models and networks that support them; our collection, use, storage, transmission and protection of personal information, including images and any biometric or biometric-adjacent data captured in the course of robot deployments, and evolving privacy, biometric and artificial intelligence laws and regulations across the jurisdictions in which we operate or intend to operate; our ability to obtain, maintain, protect and enforce our intellectual property rights and to defend against third-party claims of infringement or misappropriation; and our reliance on third-party technology, platforms and licenses.

Legal, regulatory and general. The regulated industries and jurisdictions in which we operate; current or future laws or regulations and new interpretations of existing laws or regulations, including those applicable to digital assets, robotics, autonomous systems, consumer protection, advertising and endorsements; the risk that our marketplace arrangements, or the manner in which they are described, are characterized differently than we intend by regulators or courts; the failure of counterparties to perform their contractual obligations; litigation, regulatory inquiries, investigations and enforcement actions, and their costs and outcomes; business, economic, market and capital-market conditions; competition in our industry; changes in market demand for, and the pricing of, our products and services; our ability to define, design and release new products and services in a timely manner that meet customer needs; our ability to attract, retain and motivate qualified personnel, including key management; our ability to manage our growth and our transition; and our ability to maintain effective internal control over financial reporting and disclosure controls and procedures.

This list of factors is not exhaustive. Additional risks and uncertainties are described more fully in our filings with the U.S. Securities and Exchange Commission (the "SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2025, our Quarterly Reports on Form 10-Q, and our subsequent filings, which are available on the SEC's website at www.sec.gov. Investors are urged to review the liquidity, capital resources and going concern disclosures contained in those reports.

The forward-looking statements in this Communication speak only as of the date hereof. Except as required by law, neither AIxCrypto nor any other person undertakes any obligation to update or revise any forward-looking statement or financial projection set out herein, whether as a result of new information, future events or otherwise. This Communication is provided for informational purposes only, does not constitute an offer to sell or the solicitation of an offer to buy any security, and does not constitute investment, tax or legal advice or any investment recommendation, and does not take into account the investment objectives or financial situation of any person. AIxCrypto reserves the right to amend or replace the information contained herein, in whole or in part, at any time, and undertakes no obligation to notify any recipient thereof. Readers are cautioned not to place undue reliance on these forward-looking statements. This caution is made under, and these forward-looking statements are intended to be covered by, the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995.
